Subject: RE: LeakTracker Pro Information

Calvin,

I was out of the office the second half of last week but I looked over the materials on LeakTracker Pro that you sent, thank you.

I'll see if my OOOO/a workgroup colleagues would like to get an overview of the program and what might work with people's schedules. Obviously as EPA we don't endorse any particular product but it is always nice to get familiar with what is out there in case we see it in the field or in any compliance reports.

Natalie

Subject: FW: LeakTracker Pro Information

Natalie -

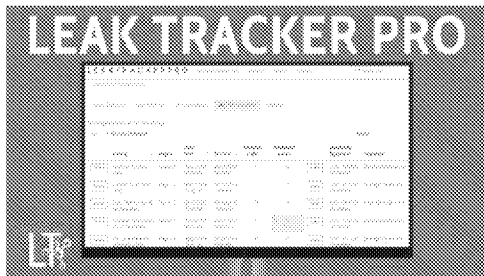

We did not really talk much about our OGI proprietary software LeakTracker Pro last week at the 4- C Conference. Our workshop was technical in nature and hence we did not want to market products during a technical venue.

We have developed an OGI software package for NSPS OOOOa, state rules and voluntary programs where OGI cameras are used to track, monitor and report leaks associated w/well sites and compressor stations.

Give us your thoughts and ideas and pass along to Kosta. I am not sure I have his email address.

Here is the fact sheet and a link to a video as well. <https://youtu.be/47Pqs2oeuqY>.

Please send this out to your Hilcorp colleagues. We can certainly schedule an upcoming webex presentation.

Learn What Leaktracker Pro™ Can Do For You!

The requirements for the NSPS Subpart OOOOa regulation are extensive and challenge the way leak data has traditionally been tracked, managed, and reported. W...
